# THE MATHEMATICS PREPRINT SERVER

— the permanent web archive and rapid distribution medium  
for research articles in the field of mathematics.

The Mathematics Preprint Server is a major new online initiative developed for the mathematics community with the aim of advancing scholarly communication in the field of pure and applied mathematics, and statistics and probability.

Its objectives are to:

- provide an active communication channel to facilitate rapid progress in the field
- catalyse and stimulate research activities
- advance the cause of mathematical achievement

The preprint server is open to all users and will include final-version articles as well as reports on work in progress. Additionally, articles can be ranked and commented on in discussion threads.

Authors are free to update or withdraw their preprints from the server, as well as to submit their articles for publication to the journal of their choice.
